## TELESTEPS

### Telescopic Ladder

A telescopic ladder can help you reach heights of up to 5 metres, anywhere. Virtually no space is too confined - the retracted ladder is just 0.78 - 1.1 metres high, depending on the model. It can be extended to its full length or step by step, so you have the right working height and a safe angle. The hardwearing aluminium tubes and perfect fit ensure the ladder has the stability required for daily professional use.

### Telescopic Combi Ladder

The new Combi Ladder acts as a free-standing stepladder, but has two extra treads which provide comfortable support for the legs, enabling you to stand steady and work at height. You decide whether to use this support or use the ladder as a traditional stepladder. With a simple manoeuvre the ladder is transformed and is equally suitable for leaning against a wall. One retractable Combi Ladder instead of three unwieldy ladders.
