BUILDING FOR THE FUTURE

Forged from the need for a range of rugged tools that live up to the high standards required by the professional tradesman, this robust range is built on a principle of quality and value for money.

As with most products, the range is constantly being developed and expanded but with Hardman there's one key difference; like the people who use them these tools work harder to ensure the best job possible.

Backer, cutting edge and cap work together to provide faster, longer-lasting cutting action.

Positive rake teeth clear chips better for longer life and easier cutting.

Bi-metal design bonds M3 cutting edge to fatigue resistant backer.

Teeth stay sharper and make smoother cuts.

Professional quality holesaws feature an M3 high-speed steel cutting edge, electron beam welded to a tough steel backer. Caps stand up to abuse and punishment, yet are light and easy to use. Positive rake tooth design provides better chip clearance as teeth cut into wood, plastic or any machinable metal. The 1.1/2" cutting depth cuts easily through 2x4's. A separate arbor is required.

Smooth cut with minimal tendency to bite or snag when cutting thinner gauge materials.

The complete multi purpose saw. Dual pitch professional saws will cut a wide range of materials, irrespective of thickness.

Cutting depth 41mm

Starrett dual pitch professional hole saws are the largest development in multi use bi metal holesaws. Featuring the smooth cutting action of constant pitch hole saws, combined with aggressive material penetration and swarf clearance, Dual pitch professional holesaws will cut equally well on thin and thicker gauge materials.
